Berghahn Books. Paperback. Book Condition: new. BRAND NEW, Security and Development, John-Andrew McNeish, Jon Harald Sande Lie, Since 9/11 ideas of security have focused in part on the development of ungovernable spaces. Important debates are now being had over the nature, impacts, and outcomes of the numerous policy statements made by northern governments, NGOs, and international institutions that view the merging of security with development as both unproblematic and progressive. This volume addresses this new security-development nexus and investigates internal institutional logics, as well as the operation of policy, its dangers, resistances and complicity with other local and national social processes. Drawing on detailed ethnography, the contributors offer new vantage points to understand the workings of multiple, intersecting, and conflicting power structures, which whilst local, are tied to non-local systems and operate across time. This volume is a necessary critique and extension of key themes integral to the security-development nexus debate, highlighting the importance of a situated and substantive understanding of human security.
